DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-13 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of copending Application No. 10/668,041, cited by applicants. Although the conflicting claims are not identical, they are not patentably distinct from each other because the addition of the mineral oil is optional in instant claims 1-6. Addition of a polybutene is shown in the dependent claims of the copending application. All other parameters, including Gardner impact strength are embraced by the claims of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Grant et al, cited by applicants.

The reference to Grant et al shows the contemplated mixture of a polyolefin homopolymer resin, which at column 3 (lines 41-65) may be the propylene homopolymer of claim 4, with a nonionic surfactant, which may be a sorbitan ester, as recited in claims 2 and 3. Note the paragraph bridging column 2 to column 3 for the sorbitan esters. Note Table V at column 8 which teaches the concept of claim 6. Since the compositions are identical, as disclosed, the physical properties, such as Gardner impact strength, would be inherently identical. Nothing in the claims, or Specification, is seen to establish any criteria to expect otherwise.

Claims 10 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jochmann et al, newly cited.

The reference to Jochmann et al shows the contemplated admixture at column 2 (lines 51-64).
